About Me

I am a detail-oriented Data Analyst with a strong foundation in Python programming, data visualization, and statistical analysis. I specialize in transforming raw data into actionable insights that drive decision-making and strategic growth. With a passion for problem-solving and continuous learning, I aim to bring value through data-driven solutions in every project I undertake.

Experience&Interns

Data Analyst Intern 2024

Data Analyst Track Udacity

Flutter Developer

Mostaqel   2020/2022
Flutter Developer

Technical Skills

- Data Analysis Tools: SQL and Excel.
- Data Visualization: Skilled in creating dashboards and reports using Power BI.
- Data Cleaning and Preparation: Strong skills in handling messy datasets and ensuring data quality.

Projects

1 Kemet-Veterinary-Pharmacy   https://github.com/MarwaMostafa10/Kemet- Veterinary-Pharmacy
- **Description : This project involves creating a comprehensive dashboard and report tailored to the operational and business needs of Kemet Veterinary Pharmacy. The goal is to provide actionable insights, improve decision-making, and streamline pharmacy management through data visualization and analysis.**

2.Arvika-Botique   https://github.com/MarwaMostafa10/Arvika-Botique
Description : The goal of this project was to create a dynamic dashboard that allows the Arvika Boutique team to easily track and analyze their sales, customer trends, and inventory levels. By integrating data visualization tools and advanced analysis techniques, the dashboard helps the business make informed decisions for inventory management and customer engagement.

3.TechnoNova-Store   https://github.com/MarwaMostafa10/TechnoNova-Store
Description: This Excel Dashboard is designed to provide a comprehensive view of an electric store's performance by visually representing sales, inventory, and customer data. The dashboard is perfect for retail managers and analysts seeking actionable insights at a glance.

Education

Faculty of Engineering Electronics&communication Dept. 2015

Soft Skills

- **Communication: Excellent at translating technical findings into understandable reports for non-technical stakeholders.**
- **Adaptability: Quick to learn new tools and adapt to changing project requirements.**
